FILE PLAN3.15

March 9, 1989; 1:28 pm - I called Sue Kennedy to check on our field team at RF. They had checked out the site and found it under a lot (4-5') of snow. They concluded that it would not be effective to visit the site this week. They would not have been able to spot the "point of entry" for the SW release.

E&E will have some people in SLC for SIs the week of 3/20. We'll probably try again then.

I will call Ed Osika and let him know our status.
